Sustainable Self-Governance in Businesses and Society

The Viable System Model in Action

Angela Espinosa

Series: Systems Thinking

Sustainable Self-Governance in Businesses and Society offers a sound introduction to Stafford Beer's Viable System Model (VSM), and clarifies its relevance to support organisational sustainability and self-governance. While the VSM has been known since the early 1980s, it hasn't been always easy to understand and to apply. It explains the Self-Transformation Methodology to analyse the way organisations manage (or not) their complexity and govern themselves.
